

We are inviting you to come to a workshop for women on cervical screening. This workshop will teach you about cervical screening and help you to make a choice if you wish to have it.

Cervical screening is a test to check if your cervix is healthy. The cervix is inside your body at the top of your vagina.

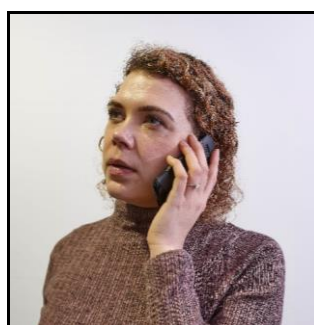

You might have heard the test called the smear test.

There are 2 workshops for you to attend; the information is on the poster sent with this letter.

After you have attended the workshops you will be invited to have your cervical screening. You will be given time to decide if you want to have this.

You can say yes or no. It is your choice.

If you would like to come to the workshop please let us know by contacting the team by email or telephone which are on the poster sent with this letter. You can also contact the team if you would like more information or to talk about the workshops.

Chair: Cathy Ellis Chief Executive: Angela Hillery
